

C-AXI-3408T1/T2 1/24 SCX24 1971 Chevrolet C10 4WD Truck RTR Black / Orange

Introduced by GM in 1967, the Chevrolet C10 became a legendary full-size pickup during its 1967-1972 second generation, often called "the last real truck" for its all-metal construction. The 1/24 scale SCX24 Chevrolet C10 RC crawler captures that legacy while adding modern customization and performance.

This model includes three interchangeable grilles (1967/68, 1969/70, 1971/72) and a removable two-tone graphic finish for flexible styling. Deep-dish slotted wheels and licensed Interco Super Swamper TSL Bogger tires deliver an authentic look and strong off-road capability.

Upgraded oil-filled shocks improve handling, while Spektrum electronics ensure reliable control. Built on the proven SCX24 platform, it features full-time 4WD, a 3-link front and 4-link rear suspension, worm gears for clearance, and durable steel frame rails.

Fully assembled and ready to run, it includes a transmitter, LiPo battery, USB charger, and AA batteries—perfect for beginners and experienced RC enthusiasts alike.

FEATURES ☰
