

GIANT-SCALE VIPER JET THRILLS

A-HAN-3625ARF / A-HAN-3625CR Viper 100N Turbine Jet ARF / ARF with Retract Set

Designed to offer fighter-jet looks and performance, along with the stability of a low-wing sport airplane, the full-scale Viper was developed to enable more pilots to enjoy flying a jet. The Hangar 9® Viper 100N Turbine Jet model follows suit, both in its appearance and how it delivers the widest flight envelope possible — whether you've flown many jets before or even if it's your first giant scale turbine jet model. Expertly crafted from lightweight balsa and plywood reinforced with carbon fiber, the Almost-Ready-To-Fly (ARF) airframe arrives ready for installation of your choice of a popular 100N class turbine engine (sold separately). A complete hardware kit, dual-wall stainless steel pipe, and fuel tank ensure you spend less time shopping for parts and more time flying. Finished in a modern trim scheme with printed covering, the Viper 100N catches your eye both on the ground and in the air.

FEATURES

- Designed for popular 100N class turbine engines (sold separately or in money-saving combos)
- Two-piece wings, stabilizers, and ventral fins plus a removable vertical stabilizer for easier storage and transport
- Modern trim scheme featuring printed covering with panel lines and other details
- Carbon fibre reinforced wood construction provides a light and strong airframe
- Includes a complete hardware set
- Detailed cockpit with a painted pilot figure and 3D instrument panels
- Complete landing gear door set with hardware and linkages
- Includes a fuel tank and dual-wall stainless steel tail pipe
- Optional reflective sun cover plus padded wing/stab and fuse bags available separately

IN THE BOX

- Hangar 9 Viper 100N Turbine Jet ARF
- Electric retract set (HAN-3625ARF Only)
- Product Manual

NEEDED TO COMPLETE

- (1) 100N class turbine engine; KingTech K-102G4+ recommended
- (1) Electric retract set (HAN-3625ARF Only)
- (1) Full-range 10+ channel transmitter
- (4) Spektrum A5070 servos - rudder, elevators, steering
- (4) Spektrum A6320 servos - ailerons and flaps
- (1) Spektrum AR20410T Receiver
- (1) Spektrum Synapse AS3X+ Module
- (2) Spektrum 2S 4000mAh G2 LiPo receiver batteries
- (1) Spektrum 3S 3200mAh G2 LiFe ECU battery
- (2) Spektrum single-sided 1.5" aluminum servo arms - ailerons
- (2) Spektrum single-sided 1.0" aluminum servo arms - flaps
- (1) Spektrum heavy-duty servo arm
- (1) KingTech 150cc air trap
- Servo extension leads
