

EFLU35050 Micro OV-10 Bronco 645mm BNF Basic with AS3X and SAFE Select

Initially conceived in the 1960s for counter-insurgency (COIN) combat, the North American Rockwell OV-10 Bronco was designed to be a versatile military aircraft that saw action as a light attack and observational platform. During the final years of the Vietnam War and in Operation Desert Storm, the Bronco excelled at anti-guerrilla operations, in air support, plus utility missions, and many are still in service today. The E-flite Micro OV-10 is a replica of the unique twin aircraft that's scaled to be affordable and practical for more RC pilots to own and fly! It's compatible with popular 3S 600-850mAh batteries and is equipped with exclusive Spektrum AS3X plus optional-use SAFE Select technologies to make it the easiest to fly OV-10 model yet. Optional-use fixed landing gear with a steerable nose wheel makes it easy to taxi, take off from, and land on smooth surfaces, or you can leave the landing gear off for more speed and performance when flying over grass. Best of all, it arrives fully factory-finished and ready to fly right out of the box to offer an authentic Bronco flying experience you can't get anywhere else!

FEATURES

- A replica of the unique and recognizable twin-turboprop light attack and observation aircraft
- Real-time overall battery voltage, current and other telemetry data with compatible transmitters (with Smart and non-Smart batteries)
- The unmatched stability and locked-in feel of exclusive AS3X technology
- Four factory-installed servos for aileron, elevator, rudders and nose gear steering control
- Take off from and land on smooth surfaces using the included landing gear plus a steerable nose wheel
- Fully-moulded strong, stiff, and lightweight EPS airframe with plastic and composite reinforcements throughout
- Convenient top-mounted hatch fully conceals the flight battery compartment
- Completely factory-assembled and ready to fly right out of the box
- Includes optional-use guns, missiles, a drop tank, and a pitot tube
- Premium fully painted with decal finish
- Functional LED navigation lights
