

C-LOS05025 1/5 5IVE-TG 3.0 Gas 4WD Desert Truck RTR

The Losi 5IVE-TG 3.0 takes large-scale RC performance to a new level, building on the legacy of the original 5IVE-T with more power, durability, stability, and control. At its heart is the new Fujiwara FJ350RC 35.2cc petrol engine, delivering stronger torque and impressive low- to mid-range acceleration. Officially licensed KMC KM549 wheels, Pro-Line Pro-Loc bead locks, and massive 8.5-inch Mirage TT tyres provide confident traction across varied terrain, while a longer wheelbase improves high-speed stability. Durable injection-moulded polypropylene body panels are designed to flex under impact and simplify replacement. Upgraded drivetrain components, revised gearing, reinforced suspension arms, and new 32mm big-bore shocks further enhance strength and handling. Maintenance is also easier thanks to a redesigned centre differential mount, while a high-torque Spektrum servo, DX3 Smart transmitter, and SR615 receiver deliver precise control and Smart telemetry capability.

FEATURES

- Fujiwara FJ350RC 35.2cc petrol engine with larger bore design for increased displacement, enhanced torque, and improved power delivery
- Massive 8.5" Pro-Line Mirage TT tyres on officially licensed KMC wheels
- Ultra-durable injection-moulded polypropylene body panels
- All new optimized gearing and easy-access centre differential
- New massive 32mm big-bore shocks with tapered pistons
- Officially licensed KMC KM549 wheels with Pro-Line Pro-Loc bead lock system
- Injection-moulded polypropylene body panels (6-piece design)
- Longer wheelbase for improved stability and scale proportions
- Easy-access centre diff mount design
- Optimized gearing: 43/12 ring and pinion with 67T spur
- New 32mm big-bore shocks with tapered pistons
- Redesigned suspension arms with reinforced shock mounting locations

IN THE BOX

- 5IVE-TG 3.0 1/5 Scale 4WD Gas Truck
- Fujiwara FJ350RC 35.2cc Petrol Engine
- Spektrum DX3 Smart DSMR 3-Channel Transmitter (SPM2340)
- Spektrum SR615 DSMR Receiver
- Spektrum 1/5-Scale Metal Top, High Torque 15T servo, 1000 oz-in Steering
- Spektrum 1/5-Scale High Torque, 15T servo, 1000 oz-in, Throttle/Brake
- Spektrum 7.4V 4000mAh 2s 15C Smart G2 Receiver Lipo Battery: IC3
- (4) AA Transmitter Batteries
- Wheel Wrench / Rod End/Turnbuckle Tool / Multi-wrench
- 2.5mm, 3mm, 4mm Allen Wrenches
- Instruction Manual

NEEDED TO COMPLETE

- Petrol (91 octane or higher recommended)
- 2-Stroke Oil (high-quality synthetic)
- Fuel Container for mixing fuel
- Compatible charger for receiver pack
