

C-AXI-2443T1/T2 1/10 SCX10 III Motobilt Waypoint Jeep JT Gladiator RTR Brown/Green

Welcome to the world of extreme off-road adventure. The Axial SCX10 III Jeep JT Gladiator captures the spirit of custom trail builds with authentic styling and proven crawling performance.

Created with Motobilt, the officially licensed polycarbonate body features Jeep's iconic 7-slot grille, detailed fender flares, moulded accessories, inner fenders and production-inspired colours. Motobilt Waypoint bumpers, Baja Designs lights, a scale CO2 tank and Hi-Lift jack add even more realism.

Maxxis Trepador tyres on KMC Grenade beadlock wheels deliver excellent trail grip. AR45 straight axles, aluminium oil-filled shocks, stainless steel suspension links and a rigid steel C-channel chassis provide durable, tunable performance.

Spektrum electronics offer precise control, including a third-channel Dig function for locking the rear axle on technical terrain. An Axial Slick Rock 35-Turn brushed motor, waterproof Firma 40A ESC and bright LEDs complete this capable, ready-to-run crawler for newcomers and experienced enthusiasts alike.

FEATURES
