

C-ARA7704V3T1 1/7 MOJAVE 6S EXB 4X4 RTR Brushless Desert Truck

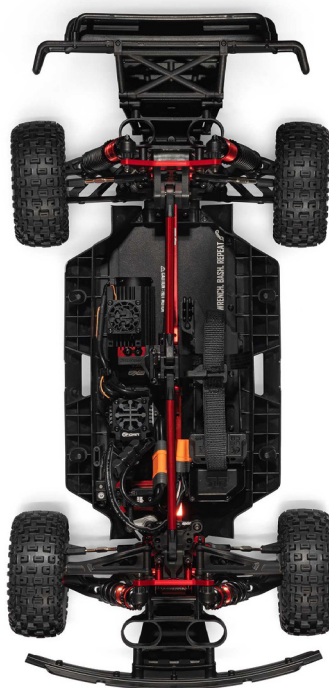

Extreme Bash hits the desert. The 1/7-scale ARRMA MOJAVE 6S 4X4 EXB returns tougher, stronger and, for the first time, ready-to-run.

Built for maximum durability, EXB upgrades include machined aluminium front and rear gearboxes, 7075 aluminium shock towers, upgraded emulsion shocks, reinforced chassis bracing, all-steel driveshafts and all-metal drivetrain components. An anodized 7075 T6 XLWB aluminium chassis delivers the rigidity needed for repeated high-speed punishment.

Power comes from a Spektrum Firma 150A Smart V2 Waterproof ESC and Firma 4074 2050Kv brushless motor, compatible with 4S or 6S LiPo power and capable of 60+ MPH. Updated ESC firmware provides smoother throttle response and improved drivability.

A new low, aggressive EXB body features hidden clipless retention and quick-release side buttons, while dBoots Fortress tyres provide dependable traction across dirt, sand, asphalt and grass.

The MOJAVE 6S EXB RTR combines serious speed with Extreme Bash durability.
