ANDERSON

No.130532 Adj. engine mount for .60~.120 model-engine. (Picture as shown)

This is a long fiber glass-filled-nylon moulded engine mount, featuring a very high durable, straighten and light-weighted quality. You can make the right adjustment according to what engine you are using. Please see attached drawing for the locations of screw hole on the engine fix plate. (1:1) You can also use this locations for installations and drilling.

No.130532 60~120 Cycles
